

# Dominion Equine Clinic &

*Cordially invite you to attend a **FREE** Informative Client Education Seminar on*

## **EQUINE INTERNAL PARASITES AND RESISTANCE**

**Presented by Dr. Mark Crisman, DVM, MS, Diplomate, ACVIM**

The equine parasites that horse owners have been fighting to control for generations continue to evolve and develop new defenses against common drugs. Receive the latest information about the parasite populations that live on your farms and learn the best methods for protecting your horses from this threat.

&

## **LAMENESS & ADVANCED JOINT THERAPIES**

**Presented by Dr. Lauren Richardson, DVM**

Athletic injuries and arthritis have a huge impact on our equine athletes and few horse owners can say that they have never had to deal with a lame horse. Today there are many options for treatment of these conditions. It can be difficult to understand the differences between IRAP, Stem Cells, PRP and therapeutic joint injections. Learn which options are available for your horse and why one might be better than another for your horse's specific problem.
